Software Developer

About Software Development at General Motors:

Our Software Development teams are responsible for the development of the industry's most innovative and sophisticated systems. We develop and deliver software solutions to GM customers, dealers, and employees across the globe. Members of our teams include industry-leading developers, architects, and designers who use a variety of innovative development methodologies and technologies to achieve breakthrough results, drive innovation and delight customers.

About the role:

The Software Developer is responsible for developing solutions that drive innovation and competitive advantage. The role encompasses writing code to build and support GM's systems, applications, and platforms as well as configuring, optimizing, and deploying packaged software (COTS). The role will interface with other project developers and architects to ensure that designs and quality are meeting GM requirements. Each Developer is envisioned to be part of the full SDLC of a project: from initiation through deployment.

Minimum Qualifications:

- Experience with programming in Java, .NET or other languages
- Knowledge of XML and relational databases (Oracle, SQL Server, MySQL)
- Familiarity with packaged software (eg., SAP, PeopleSoft, Sharepoint, etc)
- Knowledge of the Software Development Lifecycle (SDLC) as well as software development methodologies (e.g. Agile, Scrum, Iterative, Waterfall, etc.)
- Understanding of security, efficient code reuse, and software design

Preferred Qualifications:

- BS in Computer Science or related field

Why General Motors?

At GM, we've charged ourselves with one mission: to design, build and sell the world's best vehicles. And to achieve our goals, we're currently undergoing one of the largest Information Technology transformations in the history of the automotive industry.

GM IT is a leader in cutting edge technologies such as Mobility, Telematics, Mission-Critical Business Systems, Supercomputing, Vehicle Engineering, and Real-time Computing. We offer challenging positions for passionate professionals looking to get in on the ground-floor of a growing "Fortune 5" firm that is re-inventing IT with a laser focus on Innovation, Speed, and Business Value.

Join our team and experience Information Technology at a scale and pace not seen before!
