

Workshop Possibilities Beyond Graduate School

Sponsored by the College of Arts and Sciences

WORKSHOP FEATURES

This interactive workshop will introduce the best practices for preparing graduate students for life after graduate school, Dr. Cheeks life story, strategies for establishing oneself as a thought leader and expert, practical portfolio building, relationship economics, innovative careers use-cases, and contextualizing global real-world applications and problems with an emphasis on emerging technologies. During this workshop, participants will gain an introduction of the most widely used expert strategies, traditional and non-traditional careers options, and gain a sense of ways to enter global possibilities space for creating cutting-edge innovative solutions that will lead to making scientific impact when solving real-world problems.

Who should attend? Anyone with an interest and/or need to gain a vision for what is possible beyond graduate schools, lessons learnt, and strategies for being successful. No particular substantive interest required to participate.

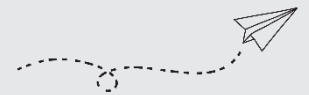

Prerequisites: We welcome all disciplines including sciences and engineering, business, law, agriculture, arts, and or health.

INSTRUCTOR

Dr. Loretta H. Cheeks, Ph.D.
CEO, Strong TIES & DS Innovation
